- HTML5 (pug, MJML)
- CSS3 (flexbox, grid)
- JS (es6+)
- CMS Wordpress
- jQuery
- SASS
- Bootstrap
- Swiper
- git, github, gitlab
- WabPeck, Gulp
- Docker
- React
- php , yii
- SQL
- API
- Linux
- Figma
- Photoshop, Illustrator

SUMMARY

I am eager to contribute to a product team as an engineer. My goal is to build comprehensive solutions, ranging from responsive UI and API integrations to full system deployment.

My focus lies within the JavaScript and PHP ecosystems, with a strong interest in applying AI-powered tools to enhance workflows. I am looking for a fast-paced environment that values engineering ownership and a commitment to technical excellence.

EXPERIENCE

FRONTEND DEVELOPER

IT StepAcademy
21.03.25 - Present

Technologies:
